EDUCATION

University of Management and Technology (UMT)

Bachelor of Science in Computer Science

Lahore, Pakistan

Sep 2023 – Expected Jun 2027

- Relevant Coursework: Data Structures & Algorithms, Software Engineering, Machine Learning, Artificial Intelligence, Database Systems, Object-Oriented Programming

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, C/C++, C#, SQL, HTML5, CSS3

Frontend: React.js, Tailwind CSS, Responsive Design, Modern UI/UX Principles

Backend & Databases: Node.js, Express.js, MongoDB, MySQL, FastAPI, Database Design

Full-Stack: MERN Stack (MongoDB, Express.js, React.js, Node.js), Next.js

Game Development: Unity, C# Fundamentals

Tools & Technologies: Git, GitHub, VS Code, Vite, Axios, TanStack React Query, Cloudinary, JWT, Render, Vercel, AI-Powered Development Tools

Core Competencies: Data Structures & Algorithms, Software Engineering, Machine Learning, Problem Solving

PROJECTS

TheXI — World Cup 2026 Football Tracking Application | *React.js, Vite, Tailwind CSS, Axios, TanStack React Query*

- Built a modern web application for tracking World Cup 2026 matches, teams, standings, and brackets
- Implemented features including match fixtures, team details, group standings, knockout stage brackets, and match schedules
- Integrated APIs for real-time data fetching using Axios and optimized state management with TanStack React Query
- Deployed on Vercel with optimized production-ready frontend architecture and responsive UI design

Vendora — Multi-Vendor E-Commerce Platform | *MongoDB, Express.js, React.js, Node.js, JWT, Cloudinary*

- Architected and developed a full-stack MERN application enabling multiple vendors to sell products in a unified marketplace
- Implemented role-based access control for Admin, Vendor, and Customer users with JWT authentication and secure login
- Built vendor dashboard for product management, inventory tracking, and order management; customer dashboard for browsing and purchasing
- Designed Admin panel for vendor oversight, product management, and platform activity monitoring
- Integrated Cloudinary for image storage and deployed frontend on Vercel and backend on Render

Hate Speech Detection Model | *Python, Machine Learning, Twitter (X) API*

- Developed a machine learning model to detect hate speech using Twitter (X) API for data collection
- Trained the model on lexicon-based features to classify offensive and non-offensive content
- Implemented data preprocessing and feature extraction techniques to improve model accuracy
- Applied natural language processing concepts learned in coursework to real-world social media data

Portfolio Website | *React.js, Tailwind CSS, JavaScript*

- Designed and developed a responsive portfolio website to showcase projects and technical skills
- Implemented modern UI/UX principles with smooth animations and clean design aesthetics
- Utilized React.js components and Tailwind CSS utility classes for efficient styling and maintainability
- Deployed the website and optimized for cross-browser compatibility and mobile responsiveness

Horror Game | *Unity, C#*

- Developed a horror-themed game using Unity game engine and C# scripting
- Implemented game mechanics including player movement, enemy AI, and environmental interactions
- Designed game levels with atmospheric lighting and sound effects to create immersive gameplay experience
- Applied object-oriented programming principles to create reusable and modular game components

EXPERIENCE

Frontend Developer

Lahore, Pakistan

Freelance Projects

- Developed web applications and landing pages using React.js and Tailwind CSS for university and personal projects
- Collaborated with peers on team projects, implementing responsive designs and interactive user interfaces
- Maintained all project code on GitHub for version control and portfolio demonstration
- Applied modern JavaScript and frontend development practices learned through coursework and self-study

CERTIFICATIONS

Web Ascend Bootcamp — MERN Stack Development

March 2026

Web Ascend, co-powered by IEEE UMT Branch

Credential No. WA-P2-2026-001

- Demonstrated proficiency in MERN stack development and full-stack web application design and deployment

LEADERSHIP & ACTIVITIES

Web Team Member | Inter AI Club, UMT

- Serve as frontend developer for the university's AI club, managing web development initiatives
- Collaborate with team members to build and maintain club website using modern web technologies

Project Lead | University Team Projects

- Led development teams for Restaurant Management System and Banking Database projects
- Coordinated team members, managed code integration, and oversaw overall development and implementation

Team Collaborator | Group Projects

- Collaborated equally on Hate Speech Detection Model and Horror Game development with team members
- Contributed to coding, testing, and project documentation in collaborative development environment

ACADEMIC HIGHLIGHTS

Relevant Coursework

- Strong academic performance in Data Structures & Algorithms, Database Systems, and Software Engineering
- Completed Web Development course, applying skills in React.js and modern frontend technologies

University Coding Competition Participant

- Participated in university-level coding competition, solving algorithmic challenges and programming problems
